BEANS

CULTURE.—About the 1st of May, if the ground is perfectly warm, select a warm, dry sheltered spot, any good soil, preferably a moist, deep loam, not over-rich in nitrogen, dig and manure very slightly; make drills 2 inches deep and 18 inches to 2 feet apart; drop the Beans 3 inches apart in the drills and cover not more than 2 inches deep. Hoe well in dry weather to keep down the weeds. Sow every two weeks up to about August 1st, for a succession. Two pounds (1 quart) to 100 feet of drill.

DWARF LIMA AND DWARF WHITE BEANS

CULTURE.—Plant as soon as the warm weather has fairly set in, or start a few under glass four weeks before setting out. Soil should be light and rich. Sow in drills 2 feet apart, the Beans about 6 inches apart, and covering about 2 inches. Two pounds to 100 feet of drill. Mulching keeps the pods from the ground.

Haricots a Rames

Fagiuoli Da

Sgusciare

Frijoles de Bejuco

CULTURE.—Sow as the soil becomes warm and dry, from the first to the latter part of May for all except Limas, in hills 4 feet apart each way. Limas should not be planted until warm weather has fairly set in. Two pounds (1 quart) of Limas will plant about 100 hills, allowing four or five Beans to a hill, and of the smaller sorts about 200 hills. Plant Pole Limas eye down, 2 inches deep. Poles 8 to 10 feet long should be firmly set in the hills before planting seed.

CORN, SWEET or SUGAR

Mais MaizKukurydza

CULTURE.—As soon as danger from frost is past, plant in hills 3 feet apart each way, and 5 or 6 kernels in a hill. The hills should be prepared before planting by digging in a shovelful of compost and a double handful of high-grade fertilizer. In spring plant 1 inch deep; later plantings 1½ to 2 inches deep. Thin out to three plants in the hill, or, if in rows, to 12 inches apart. Two pounds will plant 150 to 200 hills. Hoe often and draw soil up to stem; break off side shoots. Corn requires a warm, rich soil and a sunny exposure. Plant for a succession every two weeks until middle of July. cession every two weeks until middle of July.

Popone Melon Muscade

MUSKMELON

(Cantaloup)

Melon Muscatel Melone

Muskmelon, Thorburn's Surprise

CULTURE.—Select a light, rich, sandy soil, and, after all danger of frosts is over and the ground has become warm and dry, plant in hills 4 to 6 feet apart each way, six to twelve seeds to a hill. When up and all danger of insects has passed, pull out all but three plants. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting. Ashes or lime are excellent to sift over young plants when the dew is on, to prevent the attacks of insects. The hills should have a mixture of well-rotted manure and Thorburn's Complete Manure dug into them.

Cipollo Oignon ONION

CebollaZwiebel

CULTURE.—Sow in rich, sandy soil, in drills 1 foot apart, at the rate of 4 to 5 pounds to the acre, or 1 ounce to 100 feet of drill. Thin to 3 to 4 inches, using the rake and hoe frequently to keep down the weeds. The finest Onions are produced by the new method of sowing the seed in hotbed in February and March and transplanting the seedlings to the open ground. Against the coming of the Onion maggot scatter tobacco dust about the bases of plants. For thrips use kerosene emulsion. It is best to destroy all plants attacked.

Pomme de Terre

POTATOES

Patatas

MAINE-GROWN EXPRESSLY FOR SEED

Carman No. 1 Potato

CULTURE.—Three to four barrels to the acre, 1 peck for 100 feet of row. Select a rich soil, neither dry or wet. Cut the potatoes into chunky pieces of one-quarter or so, not thin slices, trying not to cut the eyes and having about three eyes on each piece. Plant in rows 3 feet apart, and the sets 1 foot in the rows and about 4 inches deep. Place in bottom of hill a good handful of Thorburn's Complete Manure and mix with the soil. For diseases and pests in general, beginning when the plants are up to 6 to 8 inches, spray with a mixture of Bordeaux, Paris green and Arsenate of Lead, every two weeks or so.

These are prices ruling January 1st; later on they may be higher and are subject to change without notice. We ship Potatoes entirely at customer's risk.

One barrel or sack weighs about 165 pounds net; one bushel, 60 pounds net

CULTURE.—Sow in July, thinly in rows. Cover firmly with ½ inch of fine soil. Thin plants to stand 6 inches apart in the row.

American Purple-Top. Vellow flesh; large, for table or stock feeding. \$0.15 \$0.25 \$0.85 \$0.85 \$0.25 \$0.25 \$0.85 \$0.25 \$0.85 \$0.25 \$0.25 \$0.25 \$0.85 \$0.25 \$0

Pomo D'Oro Pomo D'oro

Red Cherry...... \$0.10 \$0.50 \$1.75

TOMATO

Tomate Liebesapfel

Red Peach \$0.10 \$0.50 \$1.75

CULTURE.—Sow in a hotbed in early spring, about 1/8 inch deep, or the seed may be sown in shallow boxes and placed in a window when one does not wish to have the trouble of making a hotbed. One ounce will produce 1,500 to 2,000 plants. Transplant to the open ground when all danger of frost is past, setting the plants 3 to 4 feet apart each way. Soil should not be wet, but should have a good supply of moisture. It should be deep, with plenty of well-rotted manure.

The varieties marked (*) are best for forcing

The New Marglobe Tomato

The most important introduction since Bonny Best. An unusually productive hybrid of great

promise.

Days to Maturity, 140. It is a hybrid from Marvel, a Government strain developed from Vilmorin's Marvel of the Market, and Livingston Globe, a pink-fleshed Tomato. This stock has been selected for a pure scarlet, globe-shaped type, having the fine characteristics of the Globe. Being a hybrid, however, it has far more vigor than the Globe, is a much heavier producer, and is slightly earlier. Its magnificent appearance makes it a valuable market Tomato; sweet flavored, popular variety for home consumption. Pkt. 25c.; oz. \$1.75; ½ lb. \$6.50; lb. \$22.00.

Packets 10 cts. except where noted.	Oz.	1/4 lb.	Lb.

LAWN GRASS SEED

How to Make a Lawn

To produce a good lawn requires considerable work; do not make the mistake of trying to cheapen the preparation, for nowhere in the garden is the old axiom of "what is worth doing, is worth doing well," better illustrated than in lawn-making.

The soil must be deep; a good lawn cannot exist on poor soil. Plow the ground deeply—a foot is none too much. Apply to the soil before plowing, a heavy coating of well-rotted stable manure. Fresh manure carries too many weed-seeds; its use should be avoided. If rotted manure is not available, sheep manure or chemical fertilizers may be substituted.

Ground bone meal, 1½ tons to the acre, is a good lawn fertilizer, furnishing plant food over a long period; 100 pounds of nitrate of soda and 100 pounds of dried blood to the acre should be applied at the same time; these furnish nitrogen for immediate use. Sheep manure at the rate of 1,000 pounds to the acre may be used instead of nitrate of soda and dried blood. When only a small lawn is being made, use 20 pounds of bone meal to 250 square feet, ½ pound each of nitrate of soda and dried blood, or 6 pounds of sheep manure. Harrow and cross-harrow until the ground is thoroughly pulverized; the better harrowed the ground is, the better the grass will grow and the more permanent the lawn.

An acre requires 125 pounds of seed or one pound to each 250 square feet. Harrow or rake the ground lightly, and roll with a heavy roller.

THE THORBURN LAWN GRASS MIXTURE

Produces a splendid turf of a beautiful color and texture; quick growth and permanent. 1 lb. 55c.; 10 lbs. \$5.00; 25 lbs. \$11.00; 100 lbs. \$40.00.

LAWN GRASS SEED FOR THE SOUTH

This is a splendid mixture of grasses particularly adapted to withstand extremes of drought and heat. 1 lb. 65c.; 10 lbs. \$5.50; 25 lbs. \$13.00; 100 lbs. \$47.50.

LAWN-RESTORING MIXTURE

For reseeding of old lawns. Quickly takes hold where the grass is thin and in hard or worn spots. 1 lb. 65c.; 10 lbs. \$5.00; 25 lbs. \$12.00; 100 lbs. \$45.00.

POLO AND PLAY-GROUND MIXTURE

Produces a turf of good color and texture which withstands hard wear. 10 lbs. \$6.00; 25 lbs. \$14.00; 100 lbs. \$50.00.

SPECIAL SHADY MIXTURE

Adapted for shady places under trees or close to walls and hedges. 1 lb. 70c; 10 lbs. \$6.50; 25 lbs. \$15.00; 100 lbs. \$55.00.

SEASHORE MIXTURE

Specially compounded for successful sowing in sandy soil and under difficult climatic conditions, etc. 1 lb. 55c.; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.00.

TERRACE MIXTURE

Suitable for terraces. Compounded of grasses which take root in such a way as to prevent erosion, yet give a beautiful turf. 1 lb. 65c.; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.00.

GRASS SEED MIXTURES FOR MEADOWS AND PASTURES

It is a well-ascertained fact that thicker and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. For every different kind and condition of soil there are grasses that are especially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some pecially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some mature so early and others so late that from the beginning of spring until winter sets in there is no time when one species or another is not at its best. Grass Seed may be sown either early in spring or in fall, from the first of September to the middle of October; in this latitude the best time to sow meadow Grass Seed is during the late summer and early fall, that being the natural seeding time for grass. This will, of course, not give very much of a crop the following year; the grass will be fine and thick, but rather short, and not a heavy yield. The best meadows are seeded alone, without any "nurse" crop, while if seeded with rye, that crop being the stronger and quicker grower, will monopolize the ground so that it will be another year before much of a crop of grass can be had. For over a hundred years the House of Thorburn has made a specialty of grasses. We were probably the first to introduce to this country, for commercial distribution, the many valuable natural and cultivated foreign species that now take such an important part in our agricultural economy. The formation of permanent pastures and meadows has, for many years, been a subject of careful study with us, and the Thorburn Mixtures for seeding

and meadows has, for many years, been a subject of careful study with us, and the Thorburn Mixtures for seeding grass-lands has received universal recognition. The quantities given are the minimum, and may often be increased

to advantage.

Prices f. o. b. New York and subject to market fluctuations without notice

	MEADOW MIXTURES, Both Hay and Pasture	20 lbs.	100 lbs.	
For Light Soils.	100 lbs. to the acre	\$8.50	\$40.00	
For Heavy Soils.	90 lbs. to the acre	9.00	42.00	
For Woodland.	100 lbs. to the acre	9.50	45.00	
PASTURE MIXTURES				
For Light Soils.	80 lbs. to the acre	8.00	37.50	
For Heavy, Wet	Soils. 80 lbs. to the acre	9.00	42.00	
For Woodland.	90 lbs. to the acre	9.50	45.00	
If areas to h	e sown contain both light and heavy snots, we recommend that	they h	e sown	

separately with the proper mixtures. This method is more economical than using a mixture presumed to be adapted to such a composite situation.

		If You Desire to Sow for HAY ONLY, Use	10 lbs.	25 lbs.	100 lbs.
TIMOTHY.	Best Grade.	30 lbs. to the acre	\$1.85	\$4.25	\$16.00

WET GROUND. We strongly recommend that wet ground be sown in late August. Such areas are usually foul with weeds and in addition are water-logged in early spring, rendering it impossible to properly prepare the seed bed. The weeds crowd out the young grass and a poor stand is obtained. In August the ground is dry and warm, the weeds have finished growing, consequently the grass, which by nature grows best in the early fall, quickly establishes itself before winter.

Grasses in Separate Varieties

Grass Seeds are scarce this season. Prices subject to fluctuation		
Canada Blue Grass. Useful for sowing on hard clay, and poor soils. Gives a large crop	Lb.	100 lbs.
of hay. Sow 60 lbs. per acre. Weight per bus., 14 lbs	\$0.55	\$50.00
Chewing's Fescue. Excellent for fairways and putting-greens. Thrives also in shady places. Weight per bus., 26 lbs	. 60	55.00
Colonial Bent. Grown in New Zealand. A desirable grass for putting-greens. Weight per bus., 16 lbs	1.85	160.00
Creeping Bent (South German Mixed Bent). A natural grass from the forests of southern Germany. Used largely in this country for putting-greens. Weight per bus., 16 lbs.	1.75	160.00
Crested Dog's-tail. Valuable for pastures and lawns. Weight per bus., 20 lbs	1.00	90.00
English Rye Grass. Very nutritious, valuable for meadows and pastures. Sow 60 lbs. to the acre. Weight per bus., 24 lbs.	. 30	25.00
Fine-Leaved Fescue. Suitable for lawns and putting-greens. Weight per bus., 16 lbs	1.50	125.00
Hard Fescue. Weight per bus., 20 lbs.	55	47.50
Italian Rye Grass. Thrives in any soil and yields early and abundant crops. Valuable for pasture mixtures. Sow 50 lbs. per acre. Weight per bus., 24 lbs	.30	25.00
Kentucky Blue Grass. This is the most hardy and valuable of all northern grasses. Especially useful for lawns, meadows and rich lands. Sow 70 lbs. per acre for lawns,		
40 lbs. for pasture. Weight per bus., 21 lbs	. 50	47.50

How Supplied

MULFORD CULTURES for Legumes are supplied in concentrated form, labelled according to the exact amount of culture material (concentrate) actually supplied in each bottle (1 ounce, 3 ounce, etc.), with definite recommendations, in terms of bushels, as to the amount of seed same will inoculate. This basis simplifies the question of determining the correct quantity of culture required for proper inoculation.

The packages are in convenient sizes, ready for use.

The packages are in convenient sizes, ready for use. The directions which accompany each package, are plain and easy to follow. In ordering, be careful to

specify what crops are to be inoculated.

Why buy expensive commercial nitrates when you can grow legume crops and thus increase your yield, and, at the same time, increase the nitrates and enrich and renovate the soil, by Nature's own method?

CULTURAL HINTS ON FLOWER SEEDS

The following abbreviations are used throughout the Flower Seed Department:

HA., Hardy Annuals HHA., Half-Hardy Annuals TA., Tender Annuals HP., Hardy Perennials

HHP., Half-Hardy Perennials HB., Hardy Biennials HHB., Half-Hardy Biennials HC., Hardy Climbers

GP., Greenhouse Plants GS., Greenhouse Shrubs GB., Greenhouse Bulbs GC., Greenhouse Climbers

Hardy Annuals, HA. A rich, sandy loam, made very fine, is the most suitable soil for the smaller Hardy Annuals. There is nothing better than soil taken from old hotbeds, or sods from an old pasture that have been piled up and allowed to rot for two to three years, and then mixed with a little old stable manure and sand. The soil should be placed in shallow boxes or pots and set in a warm window, hotbed, or, if possible, in a greenhouse. Use shallow boxes or seed-pans from 2 to 3 inches deep, and of convenient size.

Sow the seed in April or May, according to your latitude. Do not make the mistake of sowing the seed too deeply—covering only to the depth of the thickness of the seeds is generally sufficient, except in the case of Sweet Peas, which should be planted 2 inches deep, or in the case of medium-sized seeds, like Balsams and Zinnias, which should be planted at least a half inch or more. Fine seeds six has partial east, a least a half inch or more. Fine seeds six has partial east, a least a half inch or more.

which should be planted at least a half inch or more. Fine seeds, such as Portulacas, need only to be pressed into the soil with a piece of board or the palm of the hand. The earth should always be pressed down firmly after sowing flower seeds, or there is danger of their drying up before the roots get firm hold of the soil.

After the seeds are up, plenty of air and moisture should be given them, but water should be judiciously applied or they will "damp off." Transplanting to other boxes may be done when the young plants are well out of the seed-leaf. When pots are not available, boxes, and the like may be used.

Half-Hardy Annuals, HHA. Follow same cultural directions as given for Hardy Annuals. Seed may be sown any time after April 15th, as the hotbed will be sufficient protection, but it is advisable to cover the glass with a mat or straw until danger of frost is past. Give plenty of ventilation during the day. After May 30th sow in the border, like Hardy Annuals.

Tender Annuals, TA. Use very light sandy compost and provide drainage in the pots by placing pieces of broken pots or bits of sod in the bottom. Cover the finer seeds no more than 1/8 inch deep and press the soil firmly over them. In order to have early bloom and strong plants, sow the seed in boxes in March, placing them in a warm greenhouse or plunging in a moderate hotbed, being careful to protect them from the cold, shade them from the midday sun, and water with a fine hose.

Hardy Perennials, HP. Follow the same cultural directions as given for Hardy Annuals, using the same soil, but the Perennials may be sown in the open border from July to September. The seeds of many perennials are slow to germinate, some requiring several months and some as long as two years. It is a good idea to cover the plants lightly with straw, leaves, or any dry litter, as soon as the frosts commence, so that they may be protected from the extremely severe winter weather.

Half-Hardy Perennials. HHP. Use same soil and cultural directions as for Hardy Annuals. Nearly all kinds of Half-Hardy Perennials may be sown in the open border in a warm and sunny spot as soon as the soil has become dry and warm, so that those who do not have cold-frames or greenhouses need not be deprived of this class of flowers, though they may have to wait a little later for their blooms.

Hardy Biennials, HB. These require the same soil and treatment as the Hardy Perennials.

Half-Hardy Biennials, HHB. Use same cultural directions as given for Half-Hardy Perennials.

Hardy Climbers, HC. Follow same cultural directions as given for Hardy Annuals or Hardy Perennials, depending on which class they belong to.

N. B.—If permission is given us to substitute, we shall use our best judgment in sending equally good sorts for those originally ordered, or a memorandum will be kept of any items not sent and the seeds will be forwarded as soon as they arrive.

ALPHABETICAL LIST OF FLOWER SEEDS

ASTERS

The Aster will thrive in any soil, from a light sand to a heavy clay.

Cover seed with ¼ inch of soil. If the soil is too poor, add a good supply of Ground Bone, mixing thoroughly. Seed sown in the open ground in May will produce plants that will bloom finely in September and October. When the plants have three or four leaves, transplant, 12 to 18 inches apart each way, into well-prepared beds. Many of our customers have complained that the listing of Asters is too confusing. We have, therefore simplified our list as much as possible.

HOLLYHOCKS (Althaea Rosea)

Although Hollyhocks are very permanent and hardy for the first winter, it is advisable to sow seed every year of these splendid, hardy perennials, as the flowers on young, vigorous plants are much finer than on old ones. Sowings should be made in April or May, and not later than June, to flower the next year. In final transplanting give each seedling a foot or more space each way for development. They succeed best in an ordinary deep, rich soil. They make a glorious show in the garden with their splendid spires of flowers and are fine for the back of the border and for hiding unsightly fences. Water well in dry weather. Average

PANSY (Viola tricolor; Heartsease)

Spring sowings should be made early so as to secure good flowers during the early rains. Seed sown in a cool, moist place in June and July, and well tended, will give good flowering plants for Spring. If they come into bloom in the heat of the summer, the flowers may be small at first, but, as the weather becomes cooler they will increase in size and beauty, and make a glorious show in the garden. Early fall sowings give the finest flowers in spring, and a bed of Pansies is one of the most beautiful sights a garden can show.

POPPY (Papaver)

For beds and borders, with a background of green, there is nothing finer. Some sorts are admirable for naturalizing in open wooded grounds; others like the Shirley, are beautiful for cutting. A sandy loam suits Poppies best, and, as their strong tap-roots are difficult to transplant, it is well to sow the seed where the plants are to bloom. Sow thinly, covering very lightly, and thin the plants to stand about a foot apart.

PERENNIAL VARIETIES. Tall, large-flowered, and showy. Average height, 2 to 4 ft. Pkt.

Orientale, Mixed Hybrids. Finest shades. \$0.15 nudicaule (Iceland Poppy). They are most beautiful when grown in masses from seed sown every year; if sown very early they

bloom same season.

The Snapdragon is one of the finest perennials, flowering the first year from seed. Its bright-colored, curiously formed flowers always excite interest. The rich spikes are beautiful for cutting, and keep fresh a long time. Flower profusely through summer until frost. For early flowers, sow under glass in February or March, and transplant into beds of warm, dry soil moderately enriched. The Snapdragon is treated as an annual and the seed sown every year.

SWEET PEAS

A deep, rich, moist soil is best suited to Sweet Peas, hence a trench should be dug 1½ feet deep and filled with very best loam mixed with bone meal or well-rotted manure. For each double row make the drills about 12 inches deep, and 9 to 10 inches apart. Sow plentifully, covering about 2 inches deep, and, by degrees, as the vines grow up, fill the trenches with soil, and thin out to about 2 or 3 inches apart. Spring sowings should be made just as early as the ground can be prepared. One ounce will sow a row of twenty-five feet. A packet will sow a row of four feet.

STOCKS

For fine early flowers sow under glass in March or April, transplanting the seedlings when an inch high into other pots or boxes, or into fine soil spread over some discarded hotbed. In May transfer to garden beds of deep, rich soil, setting the plants a foot apart. Later sowings may be made in the open ground in May. HHA.

Yellow King Humbert. 4 ft. Produces large, beautiful yellow flowers, lightly spot-		
ted red; green foliage	1.75	10.00

DAHLIAS

HOW TO GROW DAHLIAS

First, do not plant too early, never before May 1st, and much later, if possible all the way up to July 15th, in the vicinity of New York, and up to August 1st further south. In planting lay the tuber on its side about 6 inches from the surface.

Give the plants plenty of room, placing them 4 feet apart each way.

Do not fertilize too heavily. It encourages wood growth at the expense of blooms. A little well-rotted stable manure worked into the soil a month before planting is sufficient and a light feeding of Thorburn's Complete Manure when buds are developing.

A light soil is to be preferred to a heavy one. If plants grow too luxuriantly and produce few blooms, cut them back within 1 foot from the ground. Stake

the plants so they will not be blown down.

Dahlia blooms will keep longer if they are cut early in the morning (this applies to all flowers) and the stems immediately plunged into warm water and left until water cools, after which place in cold water to which a little salt has been added.

NOVELTIES

Descriptions are Those of the Raisers

Jersey's Delight. HC. The color of this variety is a beautiful rose-pink; flowers medium in size, and borne on stiff stems. Plants \$4.50.
Jersey's Empress. D. Anthracene violet in color. The large flowers are of very pleasing formation,

having narrow and wavy petals of great depth and substance. Color is practically sunproof. Tubers \$9.00; plants \$4.50.

Trentonian. D. Color is in the brown tones; the giant flowers are fine in form and produced in great quantity on fine, clean, stiff stems. Tubers \$7.00; plants \$3.75.

Charles Stratton. D. A splendid exhibition variety. Extra large; pale gold shaded and tipped with old rose. Has consistently won as the largest flower in the show. Tubers \$4.00; plants \$2.00.

THORBURN'S SELECTED DAHLIAS

THE UP-TO-DATE EXHIBITION COLLECTION

The varieties submitted below are the cream of the latest prize-winning Dahlias. Tubers will be ready for delivery April 1st. Started plants from May 1st to June 15th.

MISCELLANEOUS POPULAR DAHLIAS

The following sorts are well known for their quality and dependability and are offered at prices within the reach of all Dahlia-lovers.

Adrienne. Pom. Flowers are of perfect form, rich crimson-scarlet, slightly tipped with yellow. Free blooming and strong growing. 25c. each, 3 for 70c., 6 for \$1.30.

E. F. Hawes. C. A lovely shade of clear salmon-pink. The blooms are produced most freely on fine

long stems. 35c. each, 3 for 90c., 6 for \$1.70.

Kalif. HC. The color is a rich pure scarlet. The plants are of strong growth and bear their mammoth flowers freely on fine long stems. 75c. each, 3 for \$1.90.

King of the Autumn. D. This is one of the most admired varieties. An early and very free bloomer, on fine stems. The immense bloomers are of fine form, and an excellent autumn shade—buff-yellow suffused terra-cotta. \$1.00 each, 3 for \$2.70, 6 for \$5.00.

Nerissa. Pom. A charming little flower that should be included in every collection. It is soft pink: tinted with silver. 75c. each, 3 for \$1.90, 6 for \$3.65. **Princess Pat.** D. A most beautiful shade of old-rose.

\$1.00 each, 3 for \$2.70.

Queen of Whites. Pom. This is considered one of the best white Pompom Dahlias in existence. It

bears flowers with the greatest freedom. 25c. each, 3 for 70c., 6 for \$1.30.

Starlight. C. Rich deep yellow flowers which lighten up to a dainty lemon tint and finally to white at the tips. A fine exhibition Cactus Dahlia. 75c. each, 3 for \$2.00.

The Emperor. D. A truly immense flower of exquisite form, held well above the healthy foliage. The color is a most beautiful rich maroon. \$2.00 each.

Prices on above are for tubers. Delivery April 1st, or earlier if required.

HYACINTHUS CANDICANS

They contrast elegantly with gladiolus. Planted anywhere, singly or in clumps, they are gorgeous. \$1.50 per doz., \$10.00 per 100.

MONTBRETIAS

Should be planted in April or May and protected with leaves in winter. They ma	y be allo	wed to
remain in the ground and will continue to bloom for many seasons.	Doz.	100
Etoile de Feu. 2 ft. Very graceful soft red flowers, with orange throat	\$1.25	\$8.00
King Edmund. Fine orange-yellow flowers	1.25	8.00
Speciosa. Pleasing orange-red, with yellow throat	1.25	8.00
All Varieties Mixed	1.00	5.00

GLADIOLUS

Gladioli are very easily grown. Any good soil suits them. Plant the corms (as soon as all danger from frost is past) about 3 inches deep and 7 or 8 inches apart. By planting at intervals up to July 1st, these fine flowers can be had in bloom all through the summer and fall, the later flowers being the best. About the end of October, when the leaves begin to wither, the corms should be taken up, dried in the open air, and then stored in a dry place, free from frost, for planting next spring.

GLADIOLUS PRIMULINUS OR RUFFLED TYPES

This species of Gladiolus created a sensation wherever it was exhibited. The blooms are distinct in their pleasing form and arrangement. Although the in ividual flowers are not large, they carry an air of grace altogether different from the stiff effect of other Gladiolus.

Extra-large bulbs $1\frac{1}{2}$ inches and upwards in diameter	Doz.	100
Alice Tiplady. Brilliant orange-salmon, with golden throat	\$1.00	\$7.00
Maiden's Blush. Enchantress pink of the finest form. Extra early; splendid fo forcing.	1.00	7.00
PRIMULINUS HYBRIDS. The extremely decorative spikes of delicately colored florhigh, are most useful for cutting. Colors vary from pale primrose to rich golden yello	wers, 3 to w, pink, b	o 5 feet uff, etc.
Doz.	100	1,000
Thorburn's Exhibition Mixture. First-size bulbs	\$7.50	\$70.00
Groff's Primulinus Hybrids	4.00	37.50

Thorburn's Grandavensis Hybrids. Composed of fine sorts in all colors. Per 1,000, \$32.50.	.50	3.50

HARDY GARDEN LILIES

Hardy Lilies are among the most gorgeous and easily grown subjects for the herbaceous border, and, without crowding other plants, throw up their sturdy stems each year with an eager desire to unfold their wonderful blooms over the heads of nearby companions, and hold the admiring gaze of those who pass by. Lilies thrive in partial shade, that is, the lower stem and bulb are better shaded by the foliage of other plants. Their stem roots, which feed almost on the surface of the soil, need plenty of food and moisture. They revel in the "peaty" soil of a rhododendron bed, but thrive equally well in a rich sandy loam. The most beautiful forms are Lilium auratum, L. speciosum, vars. melpomene and rubrum, L. regale, L. tigrinum, and L. Henryi. Plant from 4 to 6 inches deep.

inches deep.			
Auratum (The Golden-banded Lily of Japan). One of the stateliest of all the harm 6 feet high, and bears twenty or more large and fragrant flowers 8 to 10 inches in clumps of six or so, they make an attractive sight. Flowers white, spotted of yellow band running through the center of each petal, in August. Extra large bulbs, 9 to 11 in. cir.	ı diame leep rec	eter. P d, with Doz. \$5.00 \$	lanted bright 100 540.00
Large bulbs, 8 to 9 in. cir. Canadense (Canadian Bellflower Lily). One of the best of our native Lilies. Flowers vary in color—red and yellow. Grows 2 to 5 feet high; very suitable to plant	. 50	3.00	24.00
among shrubbery and thrives well in the shade. Flowers in June and July. Very			
hardy	. 20		16.00
Elegans. 3 ft. Mixed colors. Vigorous and easy grower. Flowers in June Henryi (Yellow Speciosum). 4 to 5 ft. In form and habit resembles <i>L. speciosum</i> . Flowers shaded yellow, slightly varying in color, with a distinct and waxy green	. 20	1.75	12.00
center. Comes into bloom during August and September	. 70	7.50	55.00
well in all situations and produces superb flowers of rich scarlet and yellow, spotted	25	2 50	18 00
Regale (Myriophyllum). 3 to 4 ft. Of comparatively recent introduction, this variety has come to be regarded as one of the best Lilies for the garden. White flowers, trumpet-shaped, slightly suffused pink, with yellow center; Very fragrant. At its best about the end of June. Plant is very slender and takes very little room when out of flowers. Will thrive in any good soil if not too wet. Extra-large bulbs. Speciosum album. 3 to 4 ft. This is a very dainty white Lily. It flowers in the border or amongst the shrubbery at the same time as L. auratum, and is one of the most popular varieties. Used extensively in pots for greenhouses.	1.00	9.00	70.00
Extra-large bulbs, 9 to 11 in. circum	.75	6.00	45.00
Large bulbs, 8 to 9 in. circum Speciosum Melpomene. Large,	. 50	3.50	27.50
dark crimson spotted flower of striking appearance. Profuse flowering.			
Extra large bulbs, 9 to 11 in. circum	. 75	5.00	40.00
Large bulbs, 8 to 9 in. circum	. 50	3.00	24.00
a height of 3 to 4 feet. Blooms outdoors August and September. Extra large bulbs, 9 to 11 in. circum	.75	5.00	40.00

Ton \$35; carload lots in 100-lb. bags, \$12.50 per ton; carload lots in bulk, \$6 per ton.

Bone Meal for General Use. Pure ground bone. 100 lbs. \$4.50, 200 lbs. \$8.50, ton \$70.

Bone Meal, for Roses. 100 lbs. \$5,200 lbs. \$9, ton \$75.

Bones, Crushed, Coarse. For vine borders. 100 lbs. \$6.75. 200 lbs. \$1.50 spo.

lbs. \$6.75, 200 lbs. \$13, ton \$90.

Clay's Fertilizer. Highly concentrated plant food; the standby of every professional gardener. Excellent for green-house and pot plants. Amateur's size can 75c., 28 lbs. \$4, 56 lbs. \$7, 112 lbs. \$13.50.

Limestone, Ground. Cloth bags, in carload lots, \$16 per ton.

Muriate of Potash. 50 lbs. \$2.75, 100 lbs. \$5.25.

Natural Humus. 100 lbs. \$1.50, 500 lbs. \$6, ton (in bags) \$19.50. In carload lots, in bulk, \$9 per ton.

Nitrate of Soda. 167 lbs. \$10.50, ton \$120. Potato Fertilizer. Complete, highest grade. Ton \$60. Sheep Manure, Pulverized. 100 lbs. \$4.50, 200 lbs. \$7.50, ton \$70.

Scotch Soot. Promotes dark green foliage. lbs. \$6.50.

Stim-U-Plant. Tablets are packed in three sizes: Small size, 25c., containing 30 tablets; medium size, 75c., containing 100 tablets; large size, \$3.50, containing 1,000 tablets.

Sulphate of Ammonia. Excellent for improving lawns and putting greens, also used for top dressing crops. Contains ammonia, 24 per cent, and nitrogen, 16 per cent. 100 lbs. \$7.00, 200 lbs. \$12.

Tankage, Blood. Contains both bone and blood. 100 lbs. \$7.50, 200 lbs. \$14, ton \$100.

Thomson's Vine and Vegetable Manure. Safe and reliable. Excellent for vine, borders and pottted plants. 56 lbs. \$6, 112 lbs. \$11.50.

Wood Ashes, Canada Unleached. 100 lbs. \$4, ton

POTTING MATERIALS

Charcoal Dust. 100 lbs. \$6.

Lump. For orchids, etc. 100 lbs. \$6.50.

Leaf-Mould. Bag. \$3,75; carload lots, in bulk, at \$16 per ton; in bags at \$20 per ton.

Moss, Dry Sphagnum. Bale, \$4.50. Live Green Sphagnum. Bag, \$4.50. Sheet. For florists work. Bag, \$5. Peat, Fibrous. For ferns, begonias, etc. Bag, \$3.75.

For Orchids. Bag, \$4.

INSECTICIDES

Ant-Destroyer. Will positively destroy ants. 1/4-lb. tins 20c., 1/2-lb. tins 35c., 1-lb. tins 70c., 5-lb. tins \$2.75.

Aphine. Destroys aphus, thrips, mealy bug, etc. Qt.

Aphine. Destroys aphus, thrips, mealy bug. etc. Qt. \$1, gal. \$3.25, 6 gals. \$18, 12 gals. \$36.

Arsenate of Lead, Paste. For spraying fruit and vegetables. 5 lbs. \$1.50, 25 lbs. \$6, 100 lbs. \$21.

Arsenate of Lead, Powder. For spraying and dusting. One pound makes 15 gallons of solution. 5 lbs. \$2.50, 25 lbs. \$10, 100 lbs. \$30.

Black-Leaf 40. Kills black aphides and sucking insects. ½ lb. \$1.25, 2 lbs. \$3.75, 10 lbs. \$15.50.

Bordo-Lead Paste. Destroys potato bugs. 5-lb. can \$2, 25 lbs. \$6.50, 100 lbs. \$21.

Bordeaux Mixture. Effective against blight and fungus. Liquid, gal. \$2.25, 5 gals. \$9.25; Paste, 5 lbs. \$1.50, 25 lbs. \$5.25, 100 lbs. \$17.

Bordeaux Mixture, Powder. 10 lbs. \$3, 25 lbs. \$6,

Bordeaux Mixture, Powder. 10 lbs. \$3, 25 lbs. \$6, 100 lbs. \$22.50.

prowax. Effective protection against all tree borers. Gal. \$1.75, 6 gals. \$9.50.

arbola. Disinfecting white paint. For stables, cowbarns, etc. 10 lbs. \$1.50, 50 lbs. \$6, bbl. (300 lbs.)

Cutworm Killer. Kills the worms; simple and easy to use; especially prepared for bringing young plants through the critical period. 1-lb. pkg. 35c., 5-lb. pkg. \$1.50.

Fungine. Remedy for mildew, wilt and rust. Qt. \$1, gal. \$3.50, 12 gals. \$36.

Grafting Wax. Lb. 50 cts., 5 lbs. \$2.25.

Cyanogas (Calcium Cyanide). For fumigating, etc. 5 lbs. \$3, 25 lbs. \$14.

Grape Dust, Hammond's. For mould etc. 10 lbs. \$2.50, 100 lbs. \$20.

Hall's Nicotine Sulphate. 2 lbs. \$3.75.

Lime and Sulphur Solution. Kills scale. 5 gals. \$5.50, 30 gals. \$13, 50 gals. \$20.

Melrosine. A real remedy for rose-bug troubles. Dilute 1½ pints Melrosine with 3 gallons of water, for general use. Qt. \$1.75, gal. \$6.

Nicoticide. For fumigating and spraying. 4 lbs. \$8.75, 8 lbs. \$17

Nico-Fume Paper. For fumigating. 24 sheets \$1.35; 144 sheets \$6, 288 sheets \$11.

Nico-Fume Liquid. For spraying and fumigating. Lb. \$2.35. 4 lbs. \$8.50, 8 lbs. \$16.50.

Nikoteen. Lb. \$2.50, 10 lbs. \$22.50.

Paris Green. Destroys potato bugs. Lb. 70c., 5 lbs. \$3.

Pyrox. Combined insecticide and fungicide. Destroys potato bugs, etc. 5 lbs. \$2, 10 lbs. \$3.50, 25 lbs. \$7.50, 100 lbs. \$22.

Scalecide. Destroys San Jose scale. Gal. \$1.75, 5 gals. \$7.75, 30 gals. \$29, 50 gals. \$44.

INSECTICIDES—Continued

Standard Tree Bands. Protects trees and large shrubbery against all climbing worms, caterpillars, moths and insects. 25-ft. roll \$1.75, 100-ft. roll, \$6.75.

Slug Shot, Hammond's. Effective against potato bugs. 10 lbs. S2. 100 lbs. S17.50.
Tobacco Dust. For burning or dusting. 100 lbs. S5.

Tree Tanglefoot. Lb. 50c., 5 lbs. \$2.35, 10 lbs. \$4.50. **Weed Killer.** (Atlas Non-Poisonous). One gallon is ample to clear 500 square feet of densely vegetated area. Simply dilute with ten parts of water and

apply to pernicious vegetation with a sprinkling-can, 1 gal. can S2. 5-gal. drum, S8, 50-gal. drum \$55.
Wilson's O. K. Plant Spray. Very effective against all plant aphis. Gal. S3, 5 gals. \$12, 10 gals. \$20, 25 gals. \$50, 50 gals. \$90.

X-L-ALL Insecticide, Imperial. (Original). Kills mealy bugs, etc. ½ gal. \$4.50, gal. \$9, 5 gals. \$40.
Zenke's Compound Plant Insecticide. Kills white fly, red spider, mealy bug, etc. Gal. \$3, 5 gals. \$12.
Zenke's Fungicide. Effective remedy for leaf-spot, rust. mildew and black rot. Gal. \$4, 5 gals. \$18.75.

rust, mildew and black rot. Gal. \$4, 5 gals. \$18.75.

SPRAYING AND WATERING SUPPLIES

Electric Garden Hose. Undoubtedly the most satisfactory Hose. ¾-in. S30 per 100 ft.: ½-in. S25 per 100 ft

Maid of the Mist Sprinkler. (Water-Witch). \$1.25. Ring Lawn Sprinkler. Heavy brass; diameter 9 in.

The Boston Nozzle. Throws coarse or fine spray. ³/₄-in. \$1.50.

The Boston Rose-Hose Sprinkler. 3-in. face \$1.50, 4-in, face \$2.

Watering-cans, Haws' Pattern. 4-qt. \$5.25, 6-qt. \$5.75, 10-qt. \$7.50.

French. 6-qt. \$4.75, 8-qt. \$5.25, 10-qt. \$6.

Philadelphia. 4-qt. \$3.50, 6-qt. \$4, 8-qt. \$4.75, 12-qt. \$6.50.
